How can I make the most of PrattCat (http://prattcat.pratt.edu/)?
Pratt’s online catalog (PrattCat) contains records of all titles located in the Pratt Libraries including books, multimedia,
journals, magazines and newspapers. PrattCat is searchable offsite through the library website.

Searching by General Keyword. The search engine looks for important words anywhere in the record. If you search
on the word ‘environment’ you will pull up records containing that word. This can result in a large number of hits, but
not all of them may be relevant.

Searching by Subject Keyword. Subject headings are terms that describe what an item is about. If you search on the
subject heading ‘environment’ you will pull up items that are about that subject. This usually results in a smaller but
more relevant number of hits.

Selecting your Keywords. Planning & Environment are interdisciplinary – subjects related to planning include:
  housing, land use, economics, sociology, transportation, environmental studies, recreation planning, public policy,
natural resource management, planning law, urban design, heritage preservation.

- **Avery Index**
  Most comprehensive listing of journal articles on architecture and design, history and practice of architecture, landscape architecture, city planning, historic preservation and interior design and decoration. Indexes articles from nearly 800 US and foreign architectural journals published worldwide, 75% of which are not indexed in any other source. Includes articles from previous electronic version as well as records converted from Avery Library card file, with records dating from the 1860s to the present.

- **EBSCO MasterFile Select**
  Contains full text and citations for articles from over 750 journals and newspapers in all subjects.
